- Reporting & Analytics:** Power BI executive dashboards, KPI scorecards, automated portfolio reporting, real-time performance tracking
- AI-Assisted Delivery:** Using Claude and ChatGPT to accelerate governance documentation, executive summaries, and PMO reporting workflows
- Change & Adoption:** Stakeholder engagement, training & user adoption programs, cross-functional and matrix leadership
- Methodologies & Tools:** Agile, Scrum, Kanban, Waterfall, Hybrid delivery | Microsoft Project, Jira, Confluence, SharePoint, Smartsheet, Salesforce

WORK EXPERIENCE

Emirates Flight Catering (Full-Time) NOV 2024 - PRESENT

PMO Lead – Governance & Project Controls

Built and lead the PMO governance function from the ground up, driving digital reporting, project controls, and portfolio oversight for infrastructure and facilities projects.

- Established and continue to lead the PMO governance function, implementing standardized governance, project controls, executive reporting, and project assurance across infrastructure and facilities projects.
- Lead project governance activities including charter reviews, stage-gate approvals, change requests, project closure reviews, and lessons-learned sessions.

- Conduct project health reviews, milestone assessments, schedule assurance, and governance compliance reviews to identify risks, improve delivery performance, and support informed decision-making.
- Provide matrix leadership across procurement, engineering, operations, contractors, and vendors to ensure projects are delivered in line with governance, budget, schedule, and quality standards.
- Develop executive dashboards, KPI scorecards, and portfolio reports using Power BI, replacing manual status updates with real-time visibility for senior leadership.
- Drive risk management, issue escalation, and procurement coordination, delivering PMO process improvements through automation and reporting.

Relatient/Phreesia (US Healthcare SaaS)

2022- 2024

Project Manager | Senior Implementation Specialist

Directed enterprise healthcare SaaS implementations end-to-end, leading complex system integrations and the digital adoption program that made them stick.

- Directed & Managed end-to-end delivery of SaaS deployments across multiple concurrent client engagements from requirements and implementation planning through UAT, go-live, and post-implementation support.
- Led complex integrations across Salesforce, ERP, EHR, and API platforms, ensuring seamless data migration, compliance, and solution quality throughout project delivery.
- Increased client adoption by 40% through structured change management, stakeholder engagement, and training programs, turning system go-live into sustained usage.
- Developed executive dashboards and implementation performance reports that replaced manual tracking, improving project visibility and enabling faster leadership decision-making.
- Managed QA, UAT, go-live readiness, and post-implementation reviews to ensure solution quality, compliance, and successful project outcomes

DHL Express India Pvt Ltd

2012-2022

PMO Lead | Operations Project Lead

Led PMO and operational transformation initiatives, strengthening project governance, performance reporting, and process standardization to improve operational efficiency and support strategic business objectives.

- Led cross-functional projects, establishing governance processes, project controls, and KPI reporting to improve operational visibility and delivery performance.
 - Developed executive dashboards and performance reports, enabling leadership to monitor project progress, operational KPIs, and informed decision-making.
 - Collaborated with senior stakeholders to prioritize initiatives, monitor project risks, and align project outcomes with business objectives.
 - Standardized project planning, progress tracking, and reporting practices, improving governance, accountability, and execution across multiple operational initiatives.
 - Drove continuous improvement initiatives that reduced shipment delays, strengthened compliance, and enhanced service delivery through process optimization.
 - Mentored project teams and operational stakeholders on project management best practices, fostering a culture of governance, collaboration, and continuous improvement.
-
